ShopSite Knowledgebase

Availability of Authorize.net on various ShopSite platforms

Product: ALL
Version: ALL
Platform: ALL
With what versions of ShopSite and on which Operating System platforms can I use my Authorize.net account? Solution ID: S03543
With ShopSite v4.x Authorize.net integration is only available on Linux and Solaris SPARC.
With ShopSite v5.x Authorize.net is also available on Linux and Solaris SPARC, but with version 5.0.1.1 or later it is also available on IRIX (IRIX 6.5 or greater).
With ShopSite v6.x, Authorize.net is available on all UNIX platforms (BSDi, FreeBSD, Linux, Solaris SPARC, IRIX).
