Integrating LinkExchange into your store: How do I get the sale total and tracking (order) numbers?

Product: SC Pro
Version: ALL
Platform: ALL
How can you get the correct values for the sale amount and the tracking number (which should just be the Shopsite order number) to pass to LinkExchange? Solution ID: S03387
In order to do this you'll need to use the custom cgi feature in ShopSite Pro. Otherwise you can't get the correct values for the sale amount and tracking number. Information on the custom cgi feature can be found by searching for Order API at:
http://www.shopsite.com/help
In order to use Linkexchange / ClickTrade, you need your custom CGI to make an http request like this or place html like this at the top of the thankyou receipt:
