Why is the default tax selection in my shopping cart not the first option?

Product: SC
Version: 5.0
OS: ALL
When a customer adds an item to the cart the selected tax option is not the first one which should be the default value.Solution ID: S05435
This is caused by the text field for the "Add to Cart" button being empty. To resolve the problem enter text in the Add to Cart field under Preferences > Store Text > Shopping Cart. The radio button for Text does not need to be selected, there just needs to be some text in the text box.
