How do I enter text into the Meta Keywords and Meta Description text boxes for search engines to locate?

Product: ShopSite SC and ShopSite TX

Versions: All

Platforms: AllSolution ID: S03742

Text should be separated by commas in the Meta Keywords text box. The Meta Description is entered exactly the way you'd like it read by a potential visitor to your site.

There are many useful resources on the web with additional information on Meta Tags. Check search engines such as Yahoo (<http://www.yahoo.com/>) or Excite (<http://www.excite.com/>) for the sites that use them best.
