Can I combine Associate link with an OrderAnywhere link?

Product: ShopSite Pro

Version: ALL

Platform: ALL

Can I combine an OrderAnywhere link with Associate feature to have a product placed directly to the shopping cart and also have the Associate get listed for the commission?

Solution ID: S03813

When filling out the information for the Associate, in the field named "Store page (full URL)" (or "Default landing page (full URL)" in newer versions) just use the OrderAnywhere link from the product that you want ordered for the URL. This will cause a customer following an associate link to be immediately placed in the shopping basket and the associate will receive credit for the order.
