Is it possible to place products in columns using custom templates?

ShopSite: ShopSite Manager and Pro

Version: ALL

Platform: ALL Solution ID: S03865

In ShopSite v6.x the ability to have products in multiple columns has been added to the custom template feature. See the v6 documentation's Custom Template Specification for the additional 'numcolumns' parameter that can be passed to the LOOP PRODUCTS tag. The v6 documentation also contains a sample custom page template using the multi-column feature.
