group of patches fixes some problems with v8.1.2

Product: ALL

Version: v8.1.2

Platform: ALL

I have ShopSite v8.1.2 and am experiencing some technical problems, are there any patches or new releases available?

Solution ID: S5517

Yes, a group of patches for v8.1.2 is now available. If you have v8.1, v8.1.0, or v8.1.1, please upgrade to v8.1.2 before applying these patches. These patches address the issues listed below:

FILES:

pages.cgi, products.cgi, selectproduct.cgi, easyembed.cgi, coupon.cgi, rewards.cgi, category.cgi, ebayit.cgi, wizard.cgi, libsscommon.so.1 (UNIX server platforms), common.dll (Windows server platforms)

* Fixed issue with case-sensitive sort order of Products/Pages by Name and SKU in various backoffice functions.

* Fixed additional sort order issue of Product/Page names by stripping HTML from the Name before sorting for display.

order.cgi

* Fixed an issue where deleted products could show up as a line item without a Name, SKU, or Price in the shopping cart if a Publish had not been done since the product was deleted.

* Fixed issue where order subtotal may not be accurate if a product quantity was changed in the cart but no Recalculate was done before going to PayPal via PayPal Website Payments Pro (Express Checkout).

libsscommon.so.1 (UNIX server platforms), common.dll (Windows server platforms)

* Fixed [-- PAGE.Layout --] custom page template tag so product alignment works correctly in default and custom page templates that use this tag.

* Fixed stripping of HTML and JavaScript from certain parameters of registration URLs that could raise a flag in a ScanAlert scan (reported as a 'cross-site scripting' (or XSS) issue).

ebayit.cgi

* Better error message handling for eBay Add Auction.

productsearch.cgi

* Fixed stripping of HTML and JavaScript from certain input parameters to the product Search function that could raise a flag in a ScanAlert scan (reported as a 'cross-site scripting' issue).

registration.cgi, cr_groups.cgi, cr_edit_group.cgi

* Fixed a problem where coupons are not automatically added to the cart when a registered user, who is assigned to a Customer Registration group that is assigned coupons, logs in.

The patch files are located on the ShopSite partners FTP site in the [your_os]/v8.1.2/patch/ directory, so please contact your ShopSite reseller so that they can download and apply these patches for you.
