Can I change the address that e-mail notifications are sent to?

Can I change the address that e-mail notifications are sent to?Solution ID: S02566

Yes, you can.

In 4.x and later versions, from the back office, go to Preferences | Hosting Service. In the middle of the screen is a setting for "Merchant e-mail address." The address may be changed there.

In earlier versions, check under Main | Config | Technical Settings.
