Can you accept a seperate delivery address for each product?

Can you accept a seperate delivery address for each product? For instance, if you're purchasing two gifts in one order, and you want one delivered to one address and the other gift to another address, and the credit card is billed to a seperate address than those two. Solution ID: S02612

Try the following:

Put text in the "Ordering Options Text" field that says: "If you want this item delivered to an address other than the billing address, enter that address here".

Check the checkbox that says "Create Text Entry Field".

That way, the customer can enter a different address for each product.
