### **How can I make the Banner Graphic down the left side a link?**

I'm using the "Banner Graphic down left side" page template. I want it to be a link back to my main site. How do I make the banner graphic a link?Solution ID: S02661

What you can do is instead of using the "Banner Graphic down left side" template, use the "Universal Header down left side" or "Text 3 down left side" templates. Then, you can put in an tag in the Universal Header or Text 3 field, along with tags or tag to link the image.
