ShopSite Knowledgebase

CyberCash settings in "Configure Process Options"

The CyberCash settings in "Configure Process Options" in the back office do not match the values that can be found in the Merchant configuration of CyberCash.Solution ID: S03124
These are the correct mappings:
ShopSite Settings -> CyberCash Settings
CyberCash Merchant ID (CCID) -> CYBERCASH_ID
Direct Connect Key -> MERCHANT_KEY
Payment Services Host Location (URL) -> http://cr.cybercash.com/cgi-bin (always the same)
Admin Server (URL) -> http://cr.cybercash.com (also the same)
Admin Login -> Admin UserName
Admin Password -> Admin Password
