

## **ShopSite Knowledgebase**

### **TIP: How do I skip the ShopSite Wizard?**

Product: ALL

Version: ALL

Platform: ALL

I'm an experienced ShopSite developer and I don't want to go through the ShopSite wizard. How can I skip it?Solution ID: S03180

From the first screen of the ShopSite Setup Wizard, you can click on the 'ShopSite' logo/tab in the top left corner of the screen to go directly to the main ShopSite interface.

NOTE/WARNING: Skipping the Setup Wizard skips some important steps in the configuration of your store, including setting up a main page (index.html), currency symbols, shipping, tax, etc.. This can all be done through the regular interface of ShopSite, but it's recommended that you only skip the Setup Wizard if you really are an experienced ShopSite developer.
