CardService International/Linkpoint gateway, port setting hardcoded to 1129 in ShopSite

Product: ShopSite SC

Version: 6.1 and greater

Platform: ALL

I received instructions from Cardservice International/Linkpoint when I signed up for their service, however it says to use port 1139 to connect but the ShopSite port setting for this payment gateway is set to 1129 and I can't change it. What should I do?

Solution ID: S5461

You do not need to do anything, the value '1129' that is hardcoded in ShopSite is correct.

Port 1129 is the correct port for CSI/Linkpoint's new XML interface that ShopSite uses to communicate with the LinkPoint servers.

Port 1139 is the port number for CSI/Linkpoint's original non-XML interface, which ShopSite is not integrated with. Changing to this port number would break the ShopSite integration. Any CSI/Linkpoint account that will work on port 1139 should also work on port 1129 through ShopSite.
