ShopSite Knowledgebase

prices in web receipt are not lined up in columns

If the items ordered have long names, pricing is pushed to the right. If the items have short names, pricing is more left and digits don't line up under one another in columns.Solution ID: S03694
Receipts use text in version 4.1x and tables in version 4.2x. Upgrading will resolve. See http://www.shopsite.com/help/upgrading.html .
