

## **ShopSite Knowledgebase**

### **prices in web receipt are not lined up in columns**

If the items ordered have long names, pricing is pushed to the right. If the items have short names, pricing is more left and digits don't line up under one another in columns. Solution ID: S03694  
Receipts use text in version 4.1x and tables in version 4.2x. Upgrading will resolve. See <http://www.shopsite.com/help/upgrading.html> .
