ShopSite Knowledgebase

Is ShopSite available for Linux on SPARC-based systems?

Product: ShopSite SC
Versions: v4.x
Platforms: N/A
There currently is no support for ShopSite on a SPARC-based linux system. The FTP site "linux" directory only contains x86 (Intel compatible) code. Would it be possible to get a copy compiled for the Sparc64 architecture?
Solution ID: S03767
No, and there are no plans to do so due to lack of demand. Please contact your registered ShopSite CSP partner if you would like to see this. They may contact ShopSite Support on your behalf to help gauge the demand.
