Ability to add CSS or JavaScript to ShopSite-generated pages

Product: ShopSite SC and ShopSite TX

Version: ALL

Platforms: ALL

Can I add Cascading Style sheets or JavaScript to the HEAD section of HTML pages created by ShopSite? Solution ID: S03786

The HEAD section of the document is generated by the page template, and the built-in page templates are not editable. You can use the Custom Template feature to create your own page template, or you can use the following workaround to add your code via the Meta Description field:

Add something similar to the following into the Meta Description field on the Edit Page Content screen:

ENTER YOUR META DESCRIPTION HERE">
