how to make Country pull-down default to 'United States' or other country of choice

Product: ALL

Version: ALL

OS: ALL

I am using the Country pull-down menu in my ShopSite shopping cart, configured in Commerce Setup -> State & Country, but I can't figure out how to get 'United States' (or the country that most of my shoppers are located in) to be the default country listed. Can I do this?

Solution ID: S05456

ShopSite v6.2 and newer:

Yes, the default country selected in the pull-down can be chosen in the Commerce Setup -> State and Country menu by picking the default country from the 'Default Selected Country' pull-down
