

## **ShopSite Knowledgebase**

### **How can I add a feature to ShopSite, including integration with a service or software, that isn't currently available?**

Product: ALL

Version: ALL

Platform: ALL

I would like to use a software or service with ShopSite that currently isn't available. How can I request that the feature be added?Solution ID: S04051

Order API, available in ShopSite Pro, is recommended as the fastest way to interface ShopSite Pro with other services. In addition to the online help, suggestions for using Order API can be found by visiting and posting to the ShopSite Forums at:

<http://support.shopsite.com/forums>

If you would like a new feature to be added to ShopSite (including integration with an existing software or service), you may submit your request through your ShopSite reseller, or via the Enhancement Request forum in the ShopSite Forums (see address in above paragraph). As additional partners and merchants request the same feature, the likelihood of an enhancement being added to a future release of ShopSite increases.

To find new features added to the latest version of ShopSite, visit <http://www.shopsite.com/help/> and select your product. A New Features link is included on the main help page.
