How do I change the hardcoded URL under Images?

Product: ALL
Version: ALL
Platform: ALL
How can I change the hardcoded image URL that may be viewed under Images > Edit Image Attributes?Solution ID: S04138
This URL is generated from the store.auth file. To change, you will need to replace the store.auth file with one that contains the new URL.
Please note that changing the auth file URL will affect other settings and may not result in the desired changes to the ShopSite published pages. See the following solutions for more details: S04096, S03192, S03718.
