What does it mean when a solution indicates that an "enhancement request has been submitted?"

Product: ALL
Version: ALL
Platform: ALL
The ShopSite Solution for my issue indicates that an enhancement request has been submitted. What exactly does this mean?Solution ID: S04151
If you're looking for new ideas for working with ShopSite, visit the ShopSite Forums:

There you can collaborate with veteran ShopSite merchants, sharing work-around suggestions and customization tips and tricks!Solution ID: S04151
We receive many requests to add or change ShopSite features. When a request is escalated to ShopSite support through our CSP partners, an enhancement request is logged with our developers.
We track the number of request received for a particular feature addition or change. As the number of requests increase for any individual enhancement, the likelihood of it being incorporated into the next release of ShopSite increases.
There is a second, equally effective method to submit your request for a feature change (thereby increasing its chances of being considered). It is available through the online help feedback page. A link to the feedback page is available on most ShopSite help pages. You may also submit your enhancement request at:
http://www.shopsite.com/help/contact/enhancement.html
