6.1.1 maintenance release fixes some problems with initial v6.1

Product: SC

Version: 6.1

Platform: Linux, SPARC, FreeBSD

I have ShopSite v6.1 and am experiencing some technical problems, are there any patches or new releases available?

Solution ID: S5453

ShopSite, Inc. sent the following in an email to the ShopSite Tech Bulletin email list on August 21st, 2002 which announces the release of ShopSite v6.1.1 and lists the fixes made since the initial v6.1 release:

Dear ShopSite Tech Bulletin Subscriber:

We have released ShopSite v6.1.1 for the following platforms:

- * Solaris/SPARC
- * Linux (Libc 6.0, 6.1)
- * FreeBSD
- * Irix
- * BSDI (2.x and 3.x/4.x)

FIXES IN v6.1.1

PAYMENT GATEWAYS

?Resolved an ordering issue with CSI/Linkpoint if the CVV2 field is used with MasterCard, also resolved a billing issue.

?Added sending the country to CSI/Linkpoint, as a two-digit ISO code if merchant is using Country pull-down.

?Fixed a Surefire and NPC VirtualPay error that might occur if the shopper enters nothing in the address 1 field.

?ShopSite now sends the Name value to VeriSign in their Name field (this is an optional field for VeriSign).

?ShopSite will now send the ECX password (if supplied) on pre-auth transactions.

SHOPPING CART

?Fixed a coupon problem that could cause an error from order.cgi on some Pro Linux stores.

?Resolved an error that could occur on some Pro Linux stores with Inventory Tracking enabled.

?A error no longer occurs when too many items are added at once via the new Custom Template multiple add feature.

?Resolved having the shopper see an incomplete billing screen if the store is using both UPS AND Simple Shipping by Weight AND the shopper went to billing without recalculating after entering the zip code.

?If ShopSite simple shipping by weight is enabled along with UPS shipping, you can now display non-UPS countries in the country pull-down list (for use with ShopSite simple shipping)

PUBLISHING

?Addressed some formatting problems with the advanced search field in custom templates.

?Fixed a problem with the Lefty theme where pages having multiple columns did not have the right number of products in the first row.

?Fixed a potential problem generating pages when Meta Description starts with a number.

MISCELLANEOUS

- ?Addressed a product upload/match-by-sku problem that occurred when some products in the database didn't have SKU's.
- ?ShopSite Pro now re-displays Alternate Coupon Code when the merchant returns from selecting specific products for the coupon to apply to.
