### **7.0.5 maintenance release fixes some problems with v7.0.3**

Product: ALL

Version: v7.0.3

Platform: ALL

I have ShopSite v7.0.3 and am experiencing some technical problems, are there any maintenance releases available?

Solution ID: S5490

Yes, a maintenance release (v7.0.5) is now available. The issues addressed by this maintenance release are listed below. This maintenance release also includes all fixes made in the v7.0.3 patches (see ShopSite Knowledgebase article S5489 at [http://support.shopsite.com/kbase/view\\_answer.php?questionID=S5489](http://support.shopsite.com/kbase/view_answer.php?questionID=S5489)).

#### **GENERAL INFO**

The maintenance release is available on the ShopSite partner FTP site, contact your ShopSite reseller and request this update if you are experiencing any of these issues.

#### **SHOPPING CART**

\* Added stripping of html from shopping cart screen entry fields for increased security.

#### **CUSTOM TEMPLATES**

\* Fixed memory cleanup problems when generating custom templates that could cause large stores to use large amounts of RAM when doing a full Publish.

\* Modified default template code generated when using the "New Template" button to create a new custom template.

#### **MISCELLANEOUS**

\* Allow saving of text used for Variable and Quantity Pricing from the Preferences -> Search Settings screen.
