ShopSite Knowledgebase

7.1.2 maintenance release fixes some problems with v7.1 and v7.1.1

Product: ALL
Version: v7.1
Platform: ALL
I have ShopSite v7.1 or v7.1.1 and am experiencing some technical problems, are there any patches or new releases available?Solution ID: S5501
Yes, maintenance release v7.1.2 is available.
A newer v7.1.4 maintenance release includes all of these fixes, and additionally addresses the issues listed in kbase solution S5497 and kbase solution S5505. It is recommended that you update to that newer v7.1.4 version.
The v7.1.2 maintenance release includes all of those fixes, and additionally addresses the issues listed below:
SHOPPING CART
* Uncompleted PayPal shopping carts will now be kept for 21 days waiting for eCheck payments to clear in PayPal
* When Gift Certificates are being purchased, a JavaScript error will not be received if the shopper enters a Gift Certificate price with a comma as the decimal delimiter (European format)
* Fixed a potential error when the Human Validation 'Failed Attempts Limit' is reached (on Linux servers)
* The Coupon alternate codes can now be input by the shopper case-insensitive as in prior versions
* XML order downloads now include WorldPay and PayPal order processing info
* Gift Certificates are now correctly displayed in the MiniCart when they are the only item in the shopping cart.
* Fixed a potential auth file error if shopper ordered first from the search results screen then went directly from the shopping cart screen to one of the Customer Registration screens
* Sales tax is now calculated on order total after the Coupon discount is taken (see also kbase solution S5498)
* Tab-delimited order download version selection re-enabled for Manager stores (see also kbase solution S5500)
BACKOFFICE
* Numeric non-currency values can now have more than 2 decimal places in Sales Tax, exchange rate, and shipping tables
* Proper number format for the merchant's locale is now used for number input in the Sales Tax settings screen
* Added modifiable text setting for "character limit" text used in the Gift Certificate purchase screen
* Added "TESTMODE" to order processing information if order is placed while Authorize.net gateway is in test mode.
* Fixed selection of fields to download in tab-delimited page/product download so it will work better with Netscape browsers
MISCELLANEOUS
* XML order downloads will now have embedded returns in custom checkout fields replaced with |n|.
* On an upgrade, Coupons with duplicate key fields (such as Name, Alternate Code, or Coupon ID) will be noted with a warning message and the duplicated portion will be changed so there are no duplicates in the upgraded store
* Search setting 'Auto new search with stems if nothing found' now works properly (see also kbase solution S5499)
TEMPLATES
* Custom product templates no longer output extraneous meta tag with each product
* New gift certificate custom template tag for gift certificate expiration date, [-- GiftCert_Date --]
* [-- PrevNext --] tag fixed to always use the specified number of links per page.
